

GETTING SCRATCHJR

The ScratchJr app works on almost any tablet, as long as it has a recent enough operating system. You can download the app for free, directly onto your tablet.

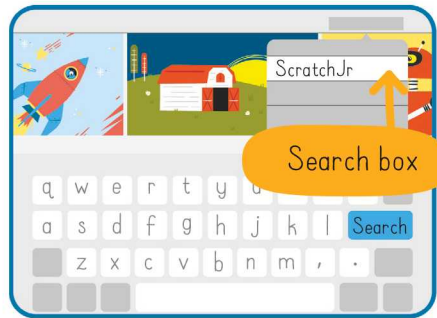

ON AN IPAD®

Check the operating system

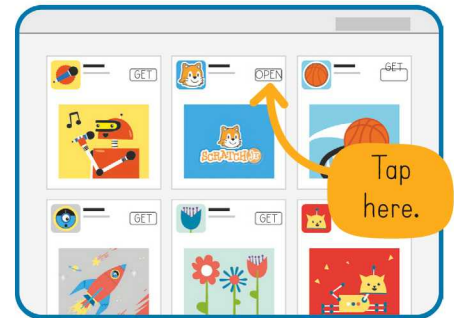

Go to 'Settings' and tap on 'General', then 'About'. Look for 'Version' - you need this number to be 7 or more.

Get the app

1. Make sure you have internet access. Then, tap the icon for the App Store. Type 'ScratchJr' into the search box and hit 'Search'.

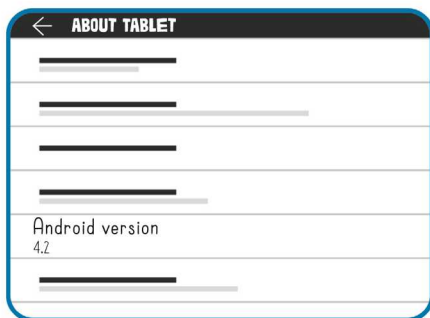

2. When you see ScratchJr, tap 'Get' then 'Install'. Enter your password if prompted. The app will download automatically. Tap 'Open' to start using it.

ON A TABLET WITH ANDROID™

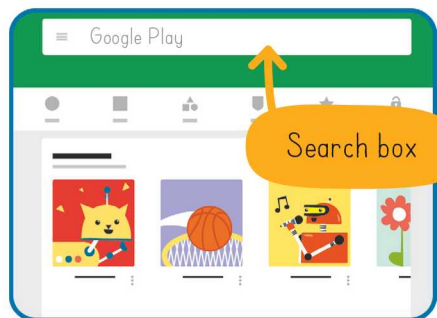

Many makes of tablet use the 'Android' operating system. The displays may look a bit different, but the tablets work in a similar way.

Check the operating system

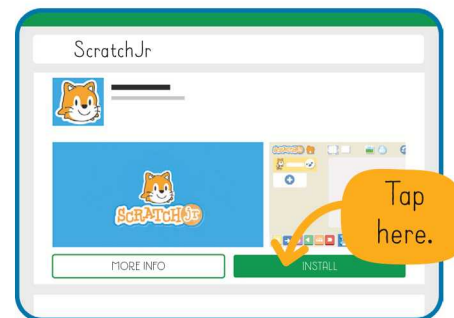

Go to 'Settings' and then 'About tablet'. Look for 'Android version' - you need this number to be 4.2 or more.

Get the app

1. Make sure you have internet access. Then, tap the icon for the Google Play™ Store. Type 'ScratchJr' into the search box and hit 'Search'.

2. When you see ScratchJr, tap 'Install'. If you get a message 'ScratchJr needs access to Camera and Microphone', tap 'Accept'.* The app will download. Tap 'Open' to start using it.

*This is so you can record sounds and use photos in the app.

ScratchJr is a collaboration between the DevTech Research Group at Tufts University, the Lifelong Kindergarten Group at the MIT Media Lab, and the Playful Invention Company.
